

Greenstone Enterprise

We understand that non-financial reporting can be challenging to navigate and manage. That's why at Greenstone we're all about **data that talks to you.**

Greenstone Enterprise is an easy-to-use, secure, modular solution to support the collection, management, analysis and reporting of non-financial data. The user-friendly platform has Environment, Health & Safety, CSR Frameworks and Supply Chain modules to provide organisations with a complete picture of their sustainability performance, better quality data, and increased confidence in their reporting. Provided as a web based solution, it's quick to setup, with no capex requirement.

How does Greenstone Enterprise work?

Collect

- Create a flexible organisational structure to gather data
- Upload data using spreadsheets, tailored input forms or automated feeds
- GHG Protocol carbon conversion factors are automatically applied

Analyse

- Monitor trends and performance using dynamic dashboards
- Run tailored comparisons and set automated threshold alerts
- Create and track progress of organisational KPIs, targets, projects, actions and risks

Report

- Easily run and export report templates to meet reporting requirements
- Run specific reports to comply with frameworks including CDP, GRI G4 and UNGC
- Access a data audit view of your data for full transparency of calculations

Data that talks to you

Environment Benefits

- Easy-to-use tool for multiple user groups across your organisation, increasing their awareness and engagement
- Remove the data management headache, enabling you to focus on analysing the results and generating reports
- Identify opportunities for carbon, consumption and cost savings, and measure initiatives performance in real time
- Audit and verification ready
- Ensure consistency of reporting to manage evolving reporting requirements
- Engage staff in energy/carbon reduction initiatives through a user-friendly platform

CSR Benefits

- Increase employee awareness and engagement
- Improve the reliability of your CSR data, tracking qualitative as well as quantitative data
- Ensure greater transparency of CSR projects and improve the consistency of reporting
- Analyse KPIs on user-friendly CSR dashboards
- Save cost and time in developing your CSR reports compared to an offline process
- Align your reporting with built in frameworks, including CDP, UN Global Compact and GRI G4

Health & Safety Benefits

- Improve the robustness of your H&S data
- Identify trends in incidents across different parts of your organisation to inform future action
- Save costs through a reduced administrative burden compared to an offline process
- Designated LTI (Lost Time Injuries) dashboard and report

Whether you're just starting out or already have a complex non-financial challenge, the flexibility of Greenstone's **modular system** will evolve with your requirements.
